

Stormwater C.3 Compliance: Planning, Design, and Construction of Low Impact Development (LID) Facilities

A free workshop for land development professionals, including civil engineers, architects, landscape architects, geotechnical engineers, developers, contractors, and municipal staff reviewers

Monday, May 23, 2011 • 8:00 am to 3:30 pm

*Centre Concord, 5298 Clayton Road, Concord
Diablo/Laurel Rooms*

- New NPDES requirements to infiltrate, evapotranspire, or harvest and reuse runoff—or to document the infeasibility of doing so
- What's new in the 5th Edition of the Clean Water Program's *Stormwater C.3 Guidebook*
- New design criteria and details for bioretention facilities
- New specifications for bioretention soils
- Successful plant palettes for bioretention facilities
- Stormwater infiltration and geotechnical concerns
- Green streets for stormwater control
- Planning LID features and facilities
- Preparing and presenting calculations to show compliance
- Communicating critical details during final design and construction
- How to avoid the most common construction errors
- Case studies

Continental breakfast provided. You may bring your own lunch or go out to one of the restaurants nearby.
