## Disposing of Wash Water

- With permission from the sanitary district and the property owner, wash water from mobile cleaners can be discharged to floor drains, utility or mop sinks, toilets, or cleanouts
- All discharges to the sanitary sewer must meet the sanitary district's discharge requirements and not contain hazardous materials
- Have appropriate equipment to discharge wastewater to the sanitary sewer, such as a pump and flexible hosing
- Direct water to landscaping or gravel surfaces. Wash water must completely soak into vegetation before you leave the site

## **WASH WATER DISPOSAL PRACTICES FOR**

# **MOBILE CLEANERS** & BUSINESSES

**Vehicle Washers Automobile Detailing Steam Cleaners Mobile Pet Groomers Window Washers Power Washers Food Vendors** 

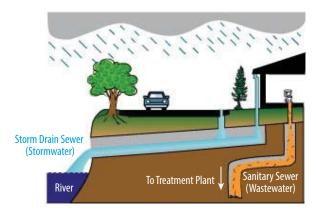

#### WHY SHOULD WE BE CONCERNED WITH

## **WASH WATER DISPOSAL?**

Wash water from mobile cleaning may contain:

- Soaps and dirt
- Oil and grease
- Toxic chemicals and heavy metals

Pollutants draining from mobile cleaning activities are washed into the street and the storm drain system which then flows to our creeks, Bay, and Ocean without any cleaning or filtering.

These pollutants may harm wildlife and degrade water quality in our creeks, Bay, and Ocean.

Allowing any material (liquid or solid) to be dumped into the storm drain, hosed off the pavement in to a storm drain, or placed where it could be carried to the storm drain by rainwater is an illegal discharge and subject to civil and criminal prosecution. Federal, state, and local regulations prohibit the discharge of anything but rain water into the storm drain.

## WHAT ABOUT BIODEGRADABLE AND NON-TOXIC

## **CLEANING PRODUCTS?**

Cleaning products labeled "non-toxic" and "biodegradable" can still harm wildlife if they enter a storm drain system. Fish, for example, are affected by both regular and biodegradable soap!

#### BEST MANAGEMENT PRACTICES (BMPs) FOR

## **WASH WATER DISPOSAL**

### Plan Ahead

- Become a BASMAA-recognized Mobile Cleaner to learn about acceptable wash water disposal practices. Visit www.basmaa.org
- Contact your local wastewater district to determine specific wash water requirements (see list at back of flyer)
- Contact your local water authority regarding applicable water conservation regulations and restrictions

Specialist using a recovery system.

- Have appropriate equipment on hand for blockage of storm drains if necessary and collection of wash water
- Train employees on the proper use of equipment and acceptable practices on the job site

### At the Job Site

- Walk the area to identify storm drains
- Block off storm drains that may be affected
- Sweep the wash and runoff area to remove debris
- Have a spill kit available in case of accidental spill or release
- Contain the wash area so that water does not flow into storm drains, down streets or gutters (using sand bags, mats or berms)
- Minimize water use
- Collect the wash water
- Remove all debris or sediment accumulated during the washing activities and dispose of it properly
